

# the great big enterprise challenge!

**no limits** enterprise challenge events are engaging, lots of fun, and tailored to meet your specific requirements.

In addition, we provide support for staff and judges, and all materials required for the event.

- **in-school or off-site:** a fabulous event which can be held in-school, or at an external venue to add to the excitement;
- **problem solving and creative thinking:** the teams are given a precise brief covering all aspects of the challenge - thereby testing their ability to creatively respond to the challenge and solve problems;
- **rising to the challenge:** challenges are tailored to meet specific school agenda and designed to develop business and enterprise skills, and ensuring all members of the group have a chance to shine;
- **plan – do – review:** challenges help students develop their project management, planning and organisational skills, constantly checking where they are and what they need to do next;
- **presentation:** the challenge will culminate in all groups making a short presentation to “pitch” their proposal / product or service, with all members of the group participating – thereby developing their communication skills;
- **award ceremony:** the event will close with an award ceremony, with all participants being awarded a certificate which provides evidence of the skills they have been developing.
- **evaluation:** an invaluable record of the skills developed during the event; visit our website to download the enterprise challenge evaluation form (linked to PLTS) and the facilitator will be happy to ensure that students complete the forms at the end of the session.

**Who for?** Years 6 - 13 (tailored to age range)

**Duration?** Group sizes, duration and cost are all variable as this is a bespoke service.

**Bespoke?** Events are tailored to meet your specific requirements. This includes the type of challenge, eg social enterprise, designing an object, ideas for regenerating an area within school or the community etc...the possibilities are limitless!
